DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Haven et al. (US 6829431).

Haven discloses a baby formula-dispensing unit comprising a reservoir capable of storing water; a heating devise capable of boiling water within said reservoir; sensor capable of detecting water's temperature and maintaining its temperature range; a tube capable of housing water to allow its flow from said reservoir to end of said tube; a valve capable of opening and closing to release or contain said reservoir said contents, a rotating assembly capable of serving bottles; a means of rotating said assembly to allow for bottles openings to be properly aligned with said tube and said compartment to assure that all said contents released are properly contained within the bottle.

Allowable Subject Matter

Claim 1 is allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
